

Dogskin Lake Lodge and Outposts

Guest Information Packet

Thank you for choosing Dogskin Lake Lodge & Outposts for your fishing destination. We consider it a privilege and will strive to make your trip to Canada the very best you will ever have. If along the way you have any questions feel free to contact us. Our goal is to have all your questions fully answered well before you depart so that you can have a relaxing and stress-free trip with us. Be sure to look at the passport requirements and go online at <https://www.dogskin.com/information-packets> to fill in your group info and any special needs your group may have. Please submit only one info request form for each group.

Thanks again and we will see you at the dock!

Contacting us during the season

The best way to contact us during the season is by email (fishing@dogskin.com). We will also be forwarding our phones to the lodge via satellite so we can be reached at (888) 364-7546.

Passport and documentation requirements

All travelers crossing the border by air - children included - are required to have a passport (or the new passport card). For those driving into Canada, passports or passport cards are required for anyone age 16 and over. Children 15 and younger will only require a birth certificate. ***Please note that all minors must have a signed and notarized note from any parent or legal guardian who isn't with them to cross the border.*** So if you are bringing up a friend's child (or even a grandchild), you'll need a notarized note from both parents allowing you to bring them across the border. If any member of the group has had a DUI or certain other offenses, look later in this document for more information.

Where to stay the night before you fly into Dogskin

Whether driving or flying commercially into Winnipeg, groups should plan to arrive in the Silver Falls area the night prior to their scheduled departure to Dogskin Lake or one of the outpost lakes. Staying overnight locally makes getting to the float plane base the next morning for your flight much easier. Many guests prefer to stay at Papertown Inn which is the closest hotel. If you are taking a shuttle to the hotel from Winnipeg International Airport, Papertown has a shuttle to the float plane base the next morning for our guests. Other options are also located in Lac du Bonnet, which is 25 minutes away.

Powerview/Pine Falls

(Approx 10 minutes to the float plane base)

[Lakeview Hotel](#) 1-204-345-8661

Getting to the float plane base

Driving

If you are driving from the United States, you have several options to get to the float plane base in Silver Falls, Manitoba. The best option for most is to take I-29 North out of Fargo, ND and come into Canada at the Pembina Crossing. At Pembina, I-29 becomes Canadian Highway #75 and will take you into Winnipeg. Options exist to travel through International Falls/Fort Frances, but travel times are slightly longer and the driving is much more work due to the conditions of the roads.

Once you get to the south side of Winnipeg you will need to travel around the East side of the city on the Perimeter Highway #100. Take #100 East for about 20 minutes and continue until you reach highway #59 North. Take Hwy #59 North. Be aware that there is an exit for #59 a few miles after you get on #100 - don't take this one or you'll get to drive through the City of Winnipeg and add some time to the drive.

If you are staying at the South Beach hotel, travel on Hwy #59 North until you reach the hotel, in the town of Scantebury. To continue on to Bluewater aviation, follow the directions in the paragraph for getting to the Papertown Motor Inn below.

If you are staying in Lac du Bonnet for the night, travel on Hwy #59 North for approximately 40 minutes at which time you will turn right, East on Hwy #317. Once on #317 you will travel for 30 minutes until you reach Hwy #11. Drifters and Lakeview hotels are in Lac du Bonnet. To reach the float plane base, travel North on #11 out of Lac du Bonnet for about 25 minutes. You will see the Blue Water Aviation Float Base on the right (East) side of the Highway.

If you are staying at Papertown Motor Inn for the night, travel on Hwy #59 North for approximately 45 minutes at which time you will turn right, East on Hwy #304. Once on #304 you will travel East for 30 minutes until you reach Hwy #11. Papertown Inn will be located on the left just before you reach #11. To reach the float plane base, turn right on #11 and travel south about 10 minutes. You will see the Blue Water Aviation Float Base on the left (East) side of the Highway.

If you are going directly to the float plane base you can take Hwy #59 North for 30 minutes. Turn East on Hwy #317 towards Lac du Bonnet. Drive to Lac du Bonnet. (Note: If you need any services Lac du Bonnet is a good place to do any last minute shopping. Go straight at the stop sign to go into Lac du

Bonnet) At the stop sign, turn left and drive North on Hwy #11 and travel 25 minutes. You will go by the small town of Great Falls. Blue Water Aviation is 10 minutes past Great Falls on the right side of the road.

For those with a GPS, the coordinates of the base are N50° 30' 00", W96° 05' 53".

Flying Commercially

Air carriers to the Winnipeg International Airport are Delta, American, and Air Canada. Delta offers a much greater variety of arrivals and departure times. If you need assistance booking a flight, give us a call, or contact our booking agent, Continental Travel Group at (800) 665-2626. They have access to special "Hunt and Fish" fares with Delta which may be cheaper than available online. Please make us aware of your plans and provide us with the airline, flight numbers and flight arrival and departure times. A space is provided on the guest information sheet. To get to the float plane base, you will either need to rent a car or take a shuttle. If you are renting a vehicle at Winnipeg, the agents available are Hertz, Budget, and Avis. Maps are available at the desks with directions to get you to Hwy 59 North. Once on #59, follow the above driving directions. If you prefer to arrange a shuttle rather than renting a car give us a call and we can assist you in arranging transportation. The shuttle is an additional fee and depends on group size. Unless you have a large group rental cars are cheaper and the preferred way to get to our float plane base from the airport.

Plan to arrive at the float plane base early!

Your entire group should be at the float plane base 45 minutes prior to scheduled departures. Late arrivals may be delayed until later in the day and charged an additional fee.

Planning and packing for your adventure

The best trips are always preceded by good planning and preparation. Bringing the right amount and type of food and gear is no accident. Don't be the group that has to pay extra to bring in all your food and gear only to load up 200 pounds of leftovers on the way out! Please take your reels off of the rods and put the rods in hard cases. Rods with tackle attached will not be allowed on the aircraft due to risk of personal injury. Transporting of alcohol is permitted, but consumption thereof is not allowed while in the Aircraft. Please do not bring glass bottles.

The size of individual pieces of luggage should not be too large. You will find it more convenient to pack three small bags as opposed to one large. If you are unable to handle your bags with ease it is certainly too large.

Weight limitations

Each individual is allowed 100 pounds of gear for trips to our outposts. If your group exceeds the allowable weight limits some gear may be held at the docks and brought in at a later time, with an overweight charge of \$2.00/pound applied. We have kitchen sinks at the outposts - please don't bring yours!

Floatplane considerations

Your very experienced bush pilots fly well maintained equipment in visual flight rules only. This means that weather has the potential to cause delays bringing you in or picking you up. Keep in mind that the weather might be perfectly fine where you are, but could be poor at the other end, up to 100 miles away. Should the aircraft not arrive to pick you up when scheduled, its safe to assume that the pilot is on a weather hold and will pick you up as soon as possible.

What we provide at our outposts

Our modern outposts are equipped with the following items:

- refrigerator and freezer
- 4-burner propane stove with oven
- BBQ grill
- 2 burner fish cooker (outside)
- assorted pots, pans, knives, utensils, glasses, plates, bowls
- garbage bags
- cleaning supplies
- toilet paper
- beds with mattresses (bring your own pillow and sleeping bag or sheets)
- sink with hot and cold running water
- shower
- floatation cushions
- landing nets
- gas
- propane
- satellite phone (\$3/minute)
- Standard 110v electrical outlets

Food

You can either bring in your own food or have us prepare a complete custom food package. If you would like us to prepare a food package for you, select this option on the online form or on the printed out version. Then go over the recommended food list and make any changes that you require. Dogskin custom food packages have been averaging \$20-25 per day per guest. This does not include beverages. Please specify your desired beverages on the food list. The list is based on a seven day trip and will be appropriately adjusted for other lengths of stay. Food packages should be returned as early as possible to assist our planning. If you are going to bring your own food, use our food package list as a good guide. Spend some time planning your meals so you can stay under the weight limits.

Fishing

All of the lakes contain great walleye and northern pike fishing. You will find both quantity and quality fish. Upon your arrival at the floatplane base, you will be issued a conservation fishing license, which is included with your package. All fish except for walleyes 14"-17" used for shore lunch are to be released. If you want to mount a trophy, simply take a photograph, measure the length and girth, and we can arrange to have a high quality, long lasting reproduction made. We ask that you register each Master Angler fish that you catch with the official entry forms that are provided. Please practice CPR (Catch, Photograph, and Release) on Dogskin fish so that future groups can enjoy the same high quality fishing that you enjoy! If you take some great pictures, feel free to post them on our messageboard or email them to us. You may end up in our brochure!

Fishing Dogskin's lakes involves jigging, trolling, and casting. We recommend medium-light to medium-heavy equipment, depending upon the species you are fishing for. Please note that Manitoba requires all fisherman to use barbless hooks. You do not need to pinch the barb on everything in your tackle box, but make sure the lure on your line is pinched tightly. Most guests will pinch a bunch of jigs down before they come so they can spend more time in the water.

For walleyes we recommend 6-8 lb. test line on a 5'10" - 6'6" medium-light rod. This can be equipped with either an open-faced spinning reel or a casting reel. You can purchase salted minnows, leeches and night crawlers from most bait shops in Canada. ¼ - ½ oz. jigs are the most popular baits. The key is to feel the bottom. Florescent colors work well. In the spring and fall, crank baits such as Rapalas and Storm Thundersticks are great!

We recommend a 6' - 7' medium-heavy rod with 17 lb. test line for northern pike fishing. ½ - ¾ oz. spoons are common baits (Dare Devils, Little Cleos, Silver Minnows, Doctor Spoons). Bring a variety of baits, shiny types to put off a flash on sunny days (gold, copper, silver) and bright types for the darker days (5 of diamonds, red & white, chartreuse, florescent colors). Mepps spinners, Bucktails, Rapalas and Storm Thundersticks are also recommended. When the pike are aggressive, bigger baits are sometimes better! Early spring and fall bring shallow running baits while, during the summer, resort to suspending and deeper diving lures. Use a quality steel leader (9"-12") to prevent cut offs.

The following is a general equipment checklist:

- rods
- reels
- tackle box
- extra line
- portable depth finder
- needle-nose pliers
- mouth spreaders
- flashlight
- insect repellent
- life jacket (floatation cushions provided)

Clothing to bring

The weather in Eastern Manitoba is similar to that in much of the Midwest United States. The best suggestion is to dress in layers as the weather can change throughout the day. Quality rain gear is a must because you don't want to sit out a day of great fishing because you get a little wet.

Documents, Clothing and Miscellaneous Checklist

- passport for everyone 16 and over and all ages travelling by airline; children 15 & under crossing in an automobile can use a birth certificate
- signed note for minors from each non-accompanying parent
- proof of vehicle insurance
- road maps
- itinerary – leave a copy at home
- Dogskin contact information
- medicines
- camera
- rain suit (good place to spend some extra \$\$)
- fishing hat
- warm hat (spring and fall)
- flannel shirt
- long-sleeve cotton shirts
- pants

- underwear
- long underwear (spring and fall)
- socks & waterproof footwear
- swim suit or shorts
- sweatshirt
- towel
- gloves (spring and fall)
- toiletries
- sunglasses
- sun screen
- sleeping bag
- pillow
- first aid kit
- backup glasses or contacts

Fishing Regulations and licenses

Conservation fishing licenses are included in your package and will be issued at the floatplane base when you check in for your flight. Fishing regulation guidebooks are available there as well. You should become familiar with the Manitoba fishing regulations. Some important ones are:

- You must have in your possession a valid fishing license.
- You may only possess the legal limit, which is 4 for the conservation license
- Barbless hooks are required. Barbed hooks may be used if the barb is pinched completely against the shaft.
- Live minnows are not allowed in the Atikaki Park. Crawlers, leeches, frozen or preserved minnows and offal (fish cleaning remains) may be used. If crawlers are being brought across the border, they must be transported in a sterile medium - not soil. Leeches must be purchased in the province of Manitoba.

The regulations can be viewed online at

<http://www.gov.mb.ca/waterstewardship/licensing/index.html>

Camp Cleanliness

We pride ourselves in giving you the best vacation that we possibly can. To do this we need your help in keeping our outpost cabins, boats and shore lunch stations cleaner they were when you arrived. Each group is responsible for keeping their cabin clean, including washing dishes and camp equipment before you leave. Please double bag your garbage and bring it with you on the flight out. It will be disposed of properly at the float plane base. The cabin should be completely cleaned before the flight arrives - if not, you'll be required to clean it while the pilot waits. Pilots hate to wait and you don't want a grumpy pilot. Cleaning supplies are provided along with brooms and mops. Please dispose of your fish remains, grease and food across the lake or far away from the cabins to deter bear from sleeping with

you. Dogskin staff will inspect the condition of the camp to make sure everything is satisfactory.

Power and Propane

Your modern outpost generates electrical power from solar panels, batteries and an inverter. The solar systems at our outposts have proven very reliable over the years. However, please remember that you are at a remote wilderness camp and that power may fail at anytime due to equipment failures, weather, etc. Don't rely on electrically powered medical devices. There is basic troubleshooting instructions for each camp in the walleye shack. The satellite phones are DC powered and should work even if cabin power is interrupted.

The stove, water heater and refrigerators utilize propane as a power source. Dogskin staff will ensure that you have sufficient quantity for your stay. If the propane bottles currently hooked up become empty, you can simply turn off the isolation and cylinder valves and exchange bottles. At Noname and Mannifrank lakes, you may be able to simply swap over to the alternate propane bank by opening and closing the appropriate valves. Pilot lights will need to be relit. We will show you how everything works when we check you in.

Do not hesitate to give us a call if you have any problems with any equipment during your stay. Contact information and usage instructions are located near the satellite phone. If someone does not answer, leave a detailed message so we know what tools and equipment to bring.

Outboard Motors

We utilize Yamaha 15 Hp 4-stroke motors at our lodge and outposts. These motors have proven very reliable and fuel efficient over the years. Since these are 4-stroke, you do not need to mix the gas. Simply take the gas out of the 300 gallon storage tank when needed. You should be able to go all day on one tank of gas. Any portage boats have 4-stroke motors, so just bring a full tank of gas with you when you utilize those boats.

The biggest issue we have with these motors is when guests allow fishing line to get wrapped up in the props. Fishing line can create a significant amount of friction and causes the prop-to-hub seal to break away. You'll know when this happens because the boat will not be able to reach full speed due to the prop spinning on the hub. Some guests mistake it for a high speed miss, which doesn't happen with these motors. The only fix is to install a new prop. However, this is very preventable and simply requires

you to remove all line from the props if you get tangled. Make sure to turn off the motor and keep safety first!

Equipment Responsibility

We can deal with normal wear and tear of equipment, but we cannot deal with negligence. You are responsible for damage beyond normal wear and tear.

Contact Info

You can contact us at the lodge during the summer by email (fishing@dogskin.com) or by sat phone (715) 955-4110. Our outposts have satellite phones available for outgoing calls. Instructions for use of the sat phone are displayed by the phone and we'll cover its use and costs when we check you in.

Entry to Canada with Criminal Offenses

You may be ineligible to travel to Canada if you have been convicted of certain crimes, depending on the severity and length of time since the conviction.

DUI laws have changed to allow those with a single offence longer than 6 months prior to enter. If the offense was less than 6 months or if there are multiple offenses, it may be more difficult. Contact us for more information.

For free consultation on any offense or on eligibility to receive a Temporary Resident Permit you may contact:

Dogskin Lake Lodge and Outposts, LTD assumes no responsibility for property loss, damage, or physical injury.

A Few Thoughts about Mannifrank Lake

- The fish are active throughout the day...weather dictates a lot of their patterns. Try to locate your best spots for morning and night, they are different. You normally find the trophy walleyes alone, not in a school. Yet, you can catch three or four 40+” northern in the same area.
- Walleyes can be early biters here. They love to feed before the sun is high. They also like to get up close to shore just before the sun goes down, especially the BIG ones. Walleyes change location frequently during the daylight hours and you need to find them.
- Biggest walleyes caught trolling or jigging deeper depths. Look for humps and troll over them, then go back and jig successful areas. The warmer the water temperatures the deeper they will tend to be.
- Time of year: May through Mid-June most walleyes are found in 6’-14’ of water. As the water warms up they go down to 20’-36’ or deeper if the water is warm. Try lots of different locations until you find them. Concentrate on structure extending off of points and reefs. Northern pike can be found just about anywhere, but many are right up against the shoreline in a few feet of water during early spring and late fall. Look for weed beds during the summer.
- Northern pike like the warm, sunny, weedy sand bottoms in the back bays of this lake. Spoons and flashy lures work best on sunny days and darker baits and brass spoons on cloudy days. Fast, jerky retrieves are best. Set the hook hard on these monsters!
- Wind controls fishing on this lake: 2 days of north wind drives the fish to the south. Conversely, 2 days of south wind pushes fish to the north.
- Troll for northern pike especially in the afternoon and late P.M.. The best northern fishing on sunny afternoons and evenings using chrome or blue. Gold and chartreuse are best on overcast days.
- Depth finders work well in getting to the right depths and finding the fish. Then it’s up to you.
- Jaw spreaders and long nose pliers should be brought to save time and the fish.
- Frozen or salted minnow work extremely well on Mannifrank Lake and can be purchased at Blue Water Aviation or at most local convenience stores. Many groups also bring in crawlers and leeches, but these are more expensive and can be difficult to find.

Walleye Baits suggested: Jig heads (barbed collar) ¼, 3/8 and ½ oz. Tie directly to 6# or 8# monofilament line. Colors: dark red, pink, chartreuse,

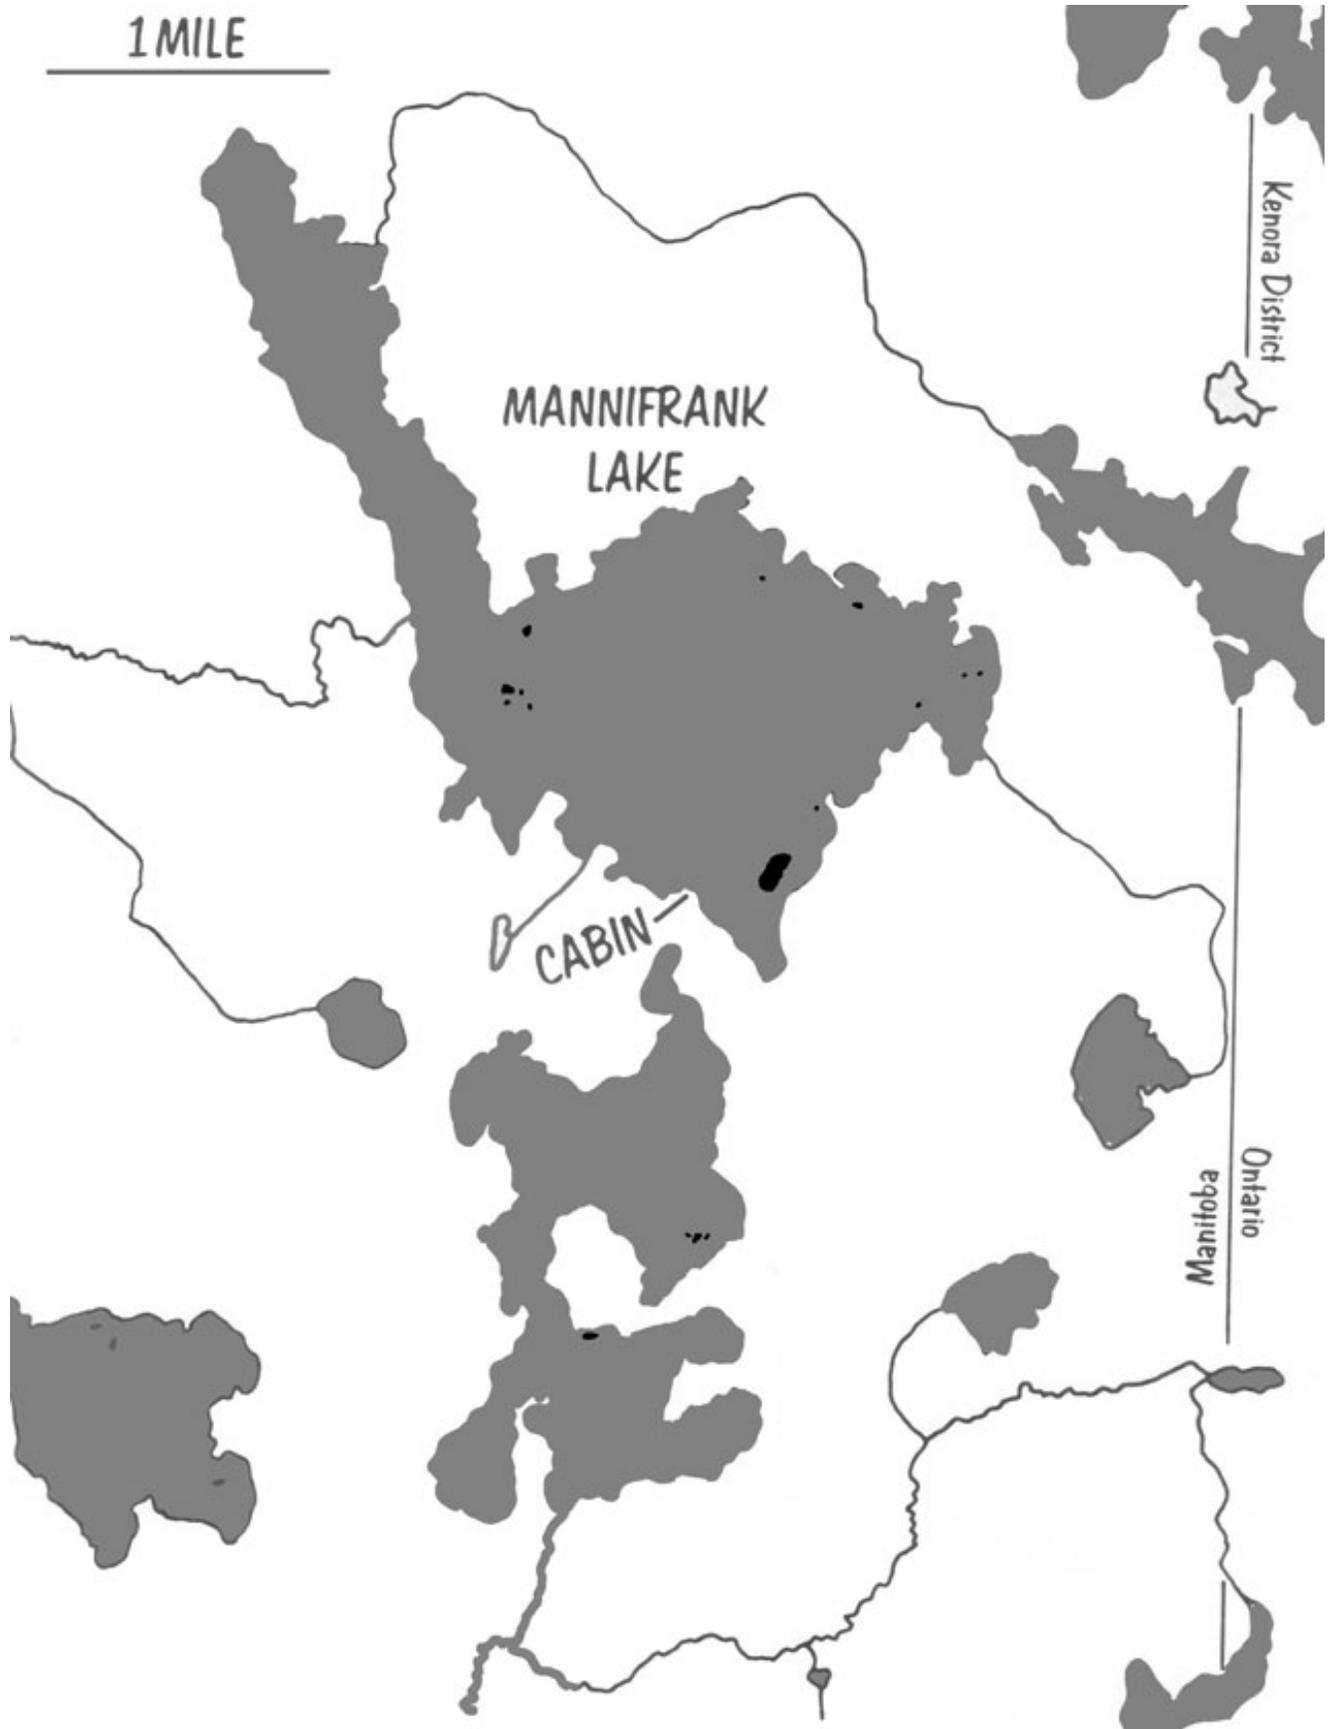

black and yellow. Bring 35-40 jig heads per fisherman. Twister tails 3", 4" and 6" (depends on the bite that day and time of year). Bring at least 100 combined colors and sizes per fisherman. Colors: dark blue, motor oil, chartreuse, pumpkinseed, yellow
 Plugs: Bill Lewis Rat'l Trap ½ oz in blue and chrome, gold and brown, dark red and gold and tequila sunrise. Wally Divers, Thundersticks, blue and chrome spoons also work well.

Northern Pike Baits suggested: Use a good 25# steel leader at least 12" long. It must be a ball bearing swivel, such as a Sampo. Don't buy cheap leaders; they will lose the big one. Bring at least 6 per fisherman. Line: At least 17# monofilament or superline. Check your line for nicks after each Pike is caught or each hit. Don't lose the trophy because of broken line! Baits: Johnson Silver Minnow 1 1/8 oz. chrome with a 2" teaser tail (yellow or white). Bill Lewis Rat'l Traps (same as Walleyes). 9" Suicks in black with white belly and red head, blue and orange with red dots. These are excellent on calm days worked over cabbage weed with a twitching motion. Buck Tails in black with red (large size). Daredevles (red & white) and Five of Diamonds in 1 oz. plus any other ugly looking large lures you want to throw at them!

The table below has a few waypoints collected from some guests. When you find some others, send us an email!
